**Laptop**

We received some laptops and took them to Kenya, but we still need more. That is why we ask again: Do you know somebody who has a laptop and doesn't use it anymore? Our students are in need. So please help us.

**Education for students**

Kevince, a member of MES-committee, wrote us as follows:

So many students drop out of school because they lack basic education or just because they are primitive. I have carefully got the interest of helping the situation. Apart from the school fee we pay and other basic things we do to the students, it would be disappointing to see them drop out of school.....The world of today is full of loverboys who are ready to lure the girls and get them pregnant.... others got infected with HIV/AIDS while others get STI's.....

others attempt the mechanism of abortion which sometimes results into death or interferes with their uterus permanently. Other students also get themselves into drug and substance abuse...We must say no to our students to be involved in such kind of activities.

Students also go to school without consideration of what they would want to become in future.....

Hence carrier talk becomes a vital factor in here.

This is why we like to hold a council inviting other like minded people in helping our students...

We are going to see how we can realise this in order to get a proper information about matters like this for our students.

**We wish you all a wonderful summertime.**
