

**Nr. 52 May 2020**

**Kenia**

Like everywhere in the world, in Kenia there is also a lot of worries about the Corona crisis and everybody's health.

Life becomes difficult every day as the country's economy is deteriorating at a very high rate.

Most parts in the country have complete lock down, making it not possible for free trade hence lack of essential goods and services.

The result is that a lot of people don't have any income any more.

Big parts of the country have been flooded due to unusual heavy rainfall, experienced in most parts of the country. Floods have killed more people than corona in Kenya accompanied by hunger.

In fact the major threat is now hunger that also kills many people.

**Students**

Until now all our students are still healthy and they observe the Corona rules. So face-protection and keeping your distance. Because they are all from a poor family they miss out their daily meal at lunchtime .that they got in school. Sometimes it was the only meal they got a day.

To make sure that they stay healthy we started providing food parcels.

For that we use part of the school money and part of our reserves as long as that is possible.

We still don't know when the schools will start again, but we think it will take a while.

In the meantime the school ask the students to study at home by e-learning, but our students can't afford to buy a laptop or a smartphone, so we fear they will fall back in results.

If they can't go to the next level because of this, we'll have to sponsor them a year extra.

Thats why we ask again: do you know somebody who has a laptop or a smartphone and doesn't use it anymore? Our students are in need. So please help us.

We wish you all a very nice summertime and we hope that you will be all in good health all the time, as well in Europe as in Kenia.
